

# Warm CHURCHES

## MEINERTZ SkyLine for pews

SkyLine from MEINERTZ is the market's most flexible, discreet and aesthetic connector for mounting under church pews. SkyLine connector is high-performance, and is produced with exactly the taps required to live up to the requirements for renovation of listed buildings. At the same time, SkyLine can be delivered in all colors, and thus is integrated almost invisibly into the construction of the bench. SkyLine comes either with standard brackets or with suspensions that MEINERTZ develops for the project. Ask us for advice!
