

MEINERTZ ProLine grille

Applications

MEINERTZ ProLine grille is a unique coverage solution when convectors are installed in trenches in the floor. The solid grille is a stylish design for places that must withstand large loads.

Product

MEINERTZ ProLine grille is a steel grille consisting of a number of profiles. The grille can be delivered in many different widths, produced to order and delivered in customized lengths up to 6000 mm.

Designation

Ex. MEINERTZ ProLine PL 00 08

PL 00 - general term
08 - number of profiles

When ordering a grille with 8 profiles and a length of 2000 mm, the designation is as follows
PL 00 08 x 2000 mm.

Curved versions

MEINERTZ ProLine grilles can also be made in curved versions to match the shape of a building. Please contact MEINERTZ for more information about curved solutions.

Manufacturing

MEINERTZ ProLine grate is made of 20 x 11 x 1.25 mm hollow steel pipes.

Removable grill

The grille can be removed, after which cleaning is possible in the duct.

Weight

0.55 kg / meter per pipe.

Surface treatment

Meinertz ProLine grilles comes standard powder-coated in RAL 7024 (graphite gray), RAL 9007 (alloy gray), or RAL 9016 (white). Can be supplied in other RAL colors for an additional fee.

Load

MEINERTZ ProLine grille can withstand a load of up to 250 kg.

Packaging

MEINERTZ ProLine grille is securely packed in strong cardboard on a pallet, after which the pallet is wrapped with PE foil.

Warranty

A 5-year warranty on manufacturing and material defects is provided, subject to proper treatment and installation. We reserve the right to make design and dimensional changes due to technical developments.

Maintenance

Can be cleaned with a regular detergent that does not contain abrasive. Scratches and damage to the surface of the paint can be repaired with traditional wet paint in a spray can or applied with a thin brush.
