

PROLINE WITHOUT HEAT!

ProLine grille for both indoor and outdoor use

ProLine grilles have many uses. It is an ideal solution for covering convector trenches. Old roller grilles can be replaced by ProLine grilles, which are so robust that you can drive over the grill with both wheelchairs and cars - and they are available in all colors! It is also possible to integrate an electrical box directly into the grate. Outdoor, the ProLine grille is perfect for e.g. rainwater ducts, where it is delivered in galvanized version with or without supplied steel duct. ProLine gratings are available up to 6 m in length and in a curved design.
